

Guardio

Application Manual

The application is a convenient interface between the user and the Guardio device. Informations mentioned below will guide you how to easy setup and use the application.

Navigation bar - lets you to switch between screens and receive current conditions from the device.

1 SYSTEM screen – here you need to provide some general settings to enable communication with your Guardio device

For your security you can provide 4 digits PIN code (default: 0000) Please note that SIM card phone number and UserA phone number should be provided first, then you can set up PIN code.

Send setting to device

2 SETTINGS screen – here you can setup work conditions, event rules and actions.

3 MAIN screen– here you can control outputs and receive conditions of inputs

Please note that the temperature and thermostat features are available only if temperature sensor is connected to the device

It would be appreciated to receive comments and suggestions to make Guardio even better.
